

Name	Description	Price
Acaena microphylla 'Copper Carpet'	An indomitable but controllable, creeping New Zealand Burr with attractive bronze-purple foliage carried on wiry stems. Likes a well drained soil in sun or part shade. 10cm.	6.90
Acis autumnalis	An oddball Snowflake, tiny white lampshades on dark stems in Autumn. Pure charm. Sun. 10cm	7.20
Aconitum carmichaelii 'Spatlese'	Meaning 'Late Harvest', this monkshood has pale lilac-blue flowers loosely held on upright stems that can reach 1.8m . Part sun / Shade.	7.50
Aconitum carmichaelii 'Arendsii'	An old favourite (1945) from Germany, for the late summer border with its bold upright spikes of deep purple- blue, helmet-like flowers. Up to 1.8m. Part shade.	7.50
Aconitum carmichaelii 'Wilsonii Group'	The last to flower with handsome spikes of rich, violet-blue hooded flowers. Sun/Part Shade. 2m.	7.50
Agapanthus 'Blue Fox'	Our choice agapanthus of recent hybridisations. Strong and upright with a full head of the deepest violet blue. Carol Klein's favourite on her last visit. Sun. 90cm.	14.00
Agapanthus 'Cheney's Lane'	A strong growing, free flowering pale blue form selected by Four Seasons Nursery. Sun. 1m	13.00
Agapanthus 'Jodie'	Dick Fulcher's superlative selection. Tall, late (Sept/October) and with mid blue flowers which seem to sing for an age in the autumn light. Sun. 1.3m.	13.00
Agapanthus 'Marchants Night Sky'	Arguably our darkest Agapanthus, a provocative violet-black. Sun. 80cm.	13.00
Agapanthus 'Windsor Grey'	A plant of noble habit with broad green leaves and subtle coloured flowers in September being a mixture of white, grey and palest lavender. Sun. 1m.	14.00
Agapanthus 'Lilliput'	A shorter African Lily with small heads of bright blue flowers. Great for border front or pots alike. Sun. 40cm.	10.00
Agapanthus 'Kew White'	Handsome broad leaves and pristine white flowers with dark anthers. Sun. 75cm.	13.00
Agapanthus 'Marchants Cobalt Cracker'	The sheer brilliance of the blue of this African Lily stops most people in their tracks. Need we say more? Sun. 70cm.	13.00
Agapanthus 'Quink Drops'	A superb inapertus hybrid, selected by us several years ago for the intensity and richness of its slightly pendulous flowers. Stands out in an Agapanthus crowd (if that is the right collective noun!) Sun. 90cm.	14.00
Agapanthus inapertus 'Pale Form'	Pale-blue pendulous flowers on sturdy stems with strap like leaves. Full Sun. 80cm.	14.00

Agapanthus Indigo Night x Quink Drops	From these seedlings we will choose our next Marchants hybrid, unless you nab it first! All different. Buy in flower to be sure you like it. Sun.	13.00
Ageratina altissima 'Chocolate'	Striking black-purple foliage and domed heads of white flowers in autumn. An asset on all accounts for any fertile border in full sun. 1m.	7.20
Alcathea suffrutescens 'Parkallee'	A beautiful cross between a Mallow and a Hollyhock. Adding a touch of creamy apricot to the late season border. Full Sun. 1.8m+.	7.20
Alchemilla conjuncta	Delicate cut foliage with a silky underside forming a silver edge. Charming. Sun/ part shade. 20cm.	7.50
Alchemilla erythropoda	Dwarf Lady's Mantle. More delicate in all its parts. Sun /Part shade. 15cm.	7.20
Allium chinense	A culinary Asian herb that provides us with a very pretty lilac-pink autumn flowering onion. Sun. 25cm.	7.20
Allium Ex Millenium 'Pale Pink Seedling'	Slightly lighter in colour than the parent plant, which is noted for the quality of its pinkish-purple summer umbels over green strapped leaves. Sun. 40cm	7.20
Allium schoenoprasum	Chives. Perfect for an oniony kick to your salad but also a pretty addition to the border. Full Sun. 40cm.	7.20
Allium lusitanicum 'Summer Beauty'	A handy small growing onion for the border front with green, fleshy linear leaves and shallow domes of lilac-mauve flowers. Sun. 50cm.	7.20
Allium senescens subsp. glaucum	An excellent border front candidate, the twisted glaucous foliage topped with domed heads of lilac-pink flowers on 20cm spikes. Sun.	7.20
Allium thunbergii 'Osawa'	A tiny Japanese species which brings the allium season to a close with its late flurry of pale purple flowers over narrow glossy leaves in Sept/Oct. Sun. 15cm	7.20
Alstroemeria 'Evening Song'	A brilliant addition to the colour range, a glowing crimson-purple. Try it with your 'Old' roses. Sun / Part Shade. 70cm.	7.50
Alstroemeria 'Red Elf'	Large glowing carmine flowers provide a display for months. It belongs at the border front and will survive bitter winters uncomplainingly. Sun / Part Shade. 45cm. AGM.	7.50
Alstroemeria psittacina	A Brazillian exotic with narrow trumpet flowers in crimson tipped with apple green, the interior decorated with dark guidelines in preparation for an insects' ball. Mulch in winter. Sun / Part Shade. 60cm.	7.50

Alstromeiria 'Friendship'	Pale yellow with the usual flecking associated with Peruvian Lilies. Wonderful for picking. Sun / Part Shade. 1m AG` M.	7.50
Althaea cannabina	From a tight rootstock, twiggy stems grow to 1.8m or more supporting through summer small pale pink hollyhock like flowers backed by green calyces. Charming and easy given good drainage. Sun.	7.50
Althaea officinalis 'Alba'	Dainty white cupped flowers over a long summer season on this lofty grey leaved perennial. Excellent with grasses. Sun. 2m	7.50
Ammi majus	A terrific lofty annual/biennial umbellifer holding its shallow domed discs of pure white flowers on 2-3m stems. Impeccable grey winter tracery. Sun / Part Shade.	6.80
Amsonia 'Graham's Hybrid'	A possible A.taebertmontana hybrid occurring here. Good foliage and clusters of pale blue-mauve flowers together with fall colour. Sun / Part Shade. 80cm.	7.50
Amsonia illustris	With broad, willow shaped leaves that colour beautifully in the autumn and pale turquoise blue starry flowers in summer, this genus deserves to be better known. Sun / Part Shade. 90cm	7.50
Amsonia orientalis	Awash with small starry slatey-blue flowers displayed on willowy leaved stems through early summer. An exercise in understatement. Sun / Part Shade. 40cm.	7.50
Amsonia orientalis 'Turkish Form'	A more recent wild collection of this Turkish endemic. A solid looking plant with paler flowers than the type, but much longer flowering. Sun / Part Shade. 40cm.	7.50
Anchusa azurea 'Loddon Royalist'	Brilliant azure flowers on branching stems. Likes a free draining soil and good on chalk. Full Sun. 1.5m.	7.50
Anemanthele lessoniana	The evergreen clump of bronzed foliage will by mid July have erupted into a cascade of fine, brown-pink flower panicles. Within a month they will have faded to a mist of gold. Sun / Part Shade. 45cm. AGM.	7.50
Anemone 'Bowles Pink'	A good strong pink Japanese Anemone with two petals slightly paler than the others. Can you tell?! Part Shade. 1m. AGM.	7.50
Anemone nemorosa 'Bowles Purple'	A delicate soft purple wood anemone with a yellow centre. Remember that it goes dormant in summer so remember where you planted it! Best in partial shade. 15cm.	6.90

Anemone hortensis	One of our earliest flowering plants here at Marchants, this mediterranean violet/pink anemone has a blue centre. Such a treat for those bleak February days. Sun /Part Shade. 25cm.	7.80
Anemone hupehensis var. japonica 'Bodnant Burgundy'	Richest pink fine-petalled (slightly doubled?) flowers over a compact plant. Not quite the lightest pinot noir, but a good rich colour. Part Shade. 60cm.	7.50
Anemone nemorosa 'Blue Eyes'	A charming, old, double white Wood Anemone whose central stamens are surrounded by the stain of a purple eye. Shade. 10cm	6.90
Anemone nemorosa 'Parlez Vous'	A strong plant collected behind the 1 st World War trenches in France. Silvery lavender-blue chalices, superb with dark purple Hellebores. Shade. 10cm	6.90
Anemone nemorosa virescens	A beautiful curiosity, the flowers having metamorphosized into a loose ruff of bright green bracts. Shade. 10cm.	6.90
Anemone x hybrida 'Geante des Blanches'	Large semi-double white flowers, the narrow ray petals forming a rather flat faced flower. Robust. Part Shade. 1m.	7.50
Anemone x hybrida 'Honorine Jobert'	Pristine and pure – reckoned to be the best white. Part Shade. 1.2m. Sun / Part Shade.	7.50
Anemone x lipsiense vindobonensis	Pale butter yellow flowers are a delight in spring. The young foliage carries a red blush. Full Sun/ Part Shade. 15cm.	6.90
Anemonella thalictroides 'Mid Lilac'	A dainty anemonella that needs a bit of care and your best soil to perform well. But for possibly one of the prettiest plants, we think it's worth it. Part Shade.10cm.	6.90
Anthericum racemosum	Starry white flowers in summer on branched slender stems creates an airy effect when established - sun and good drainage preferred. Border, pot or meadow even? 30cm	7.20
Artemisia lactiflora 'Elfenbein'	A great form from the continent with munificent branched heads of ivory white flowers in late summer. Sun / Part Shade. 1.5m.	7.50
Artemisia ludoviciana 'Valerie Finnis'	Grown primarily for the foliage, this Mugwort offers an invaluable silver contrast in the border. AGM. Full Sun. 60cm.	7.50
Arum italicum 'Tiny'	A rare marbled leaf form growing no taller than 20cm. Particularly good amongst winter/spring bulbs. Summer dormant. Sun / Part Shade.	6.90
Asarum splendens	Chinese Wild Ginger. Not a true ginger but possessing ginger smelling roots. The striking silver mottled leaves shield clandestine, large, weird chocolate- purple and white flowers. Shade. 15cm.	7.20

Asclepias incarnata	Willowy stems to 1m terminating in nodding clusters of small, dusky rose pink flowers. Demure, subtle and little known. Sun. 1m.	7.50
Asphodeline liburnica	Later flowering than A.lutea, with bright yellow flowers that stand more prominent from the stem, with a central green vein on each petal. Flowers in June/ July. Full Sun. 1m.	7.50
Asphodeline lutea	Yellow flowers cling to the grey green stem above the grass like foliage, rather like a fizzy sparkler on bonfire night. From rocky and scrublike terrain. Full Sun. 90cm.	7.50
Aster ageratoides 'Asran'	A lovely pale lilac Aster, generously flowering from September to November and a magnet for bees and butterflies. Gently spreading, so one to keep an eye on. Fabulous with grasses. Sun. 60cm.	7.50
Aster ageratoides 'Ezo Murasaki'	Small purple flowers, pleasingly late, combined with mildew resistance make for a tough, easy going Japanese aster. Sun / Part Shade. 60cm.	7.50
Aster amellus 'Framfieldii'	An elegant hybrid, not dissimilar to 'Violet Queen' but a slightly paler violet. Sept/Oct. Sun. 40cm. AGM.	7.50
Aster sedifolius 'Nanus'	Now Galatella sedifolia. Flowering profusely from late summer, the Rhone Aster has finely spaced violet purple petals and fine foliage. Best in full sun. 60cm.	7.50
Aster x frikartii 'Monch'	This is arguably the finest Aster for elegance and flower power, giving a succession of clear lavender blue flowers from midsummer onwards. Sun. 80cm.	7.50
Astrantia 'Buckland'	The pale green ruff of bracts and rosy pink stamens make for a flower of great beauty. Sun /Part Shade. 60cm.	7.50
Astrantia major 'Ruby Wedding'	Richest of ruby-red flowers over a long season. Sun / Part Shade. 60cm.	7.50
Astrantia major ex. 'Canneman'	The parent plant is a hearty grower with large greyish-green flowers, stained a reddish purple. Sun / Part Shade. 50cm.	7.50
Astrantia major subsp. involucrata 'Canneman'	A fine, large greyish-green flowered form, stained with reddish-purple. A hearty grower, flowering for weeks in early summer. Sun / Part Shade. 50cm.	7.50
Athyrium filix-femina 'Frizelliae'	The tatting fern. So distinct and pretty with pinnae reduced to circular lobes, well spaced along the arching wiry mid-rib. Shade. 40cm. AGM.	7.80
Athyrium niponicum var. pictum	The elegant and beautiful Japanese Painted Fern in shades of grey, silver and dusky purple. Needs shelter and good soil to give of its best. Shade. 20cm. AGM.	8.50

Atriplex hortensis var.rubra	Red Orach. This lofty spinach relative, is an annual that will seed about happily, giving a beautiful colour in the border and a tasty salad in the bowl! Sun. 1.5m+	6.80
Baptisia australis 'Caspian Blue'	Racemes of violet-blue pea like flowers in May and June, followed by further growth of the luxurious glaucous foliage. Sun. 1m.	8.00
Baptisia australis 'Nelson's Navy'	Bears the usual good, slightly glaucous foliage of this Genus. The flowers are deep navy-blue making it the darkest Baptisia we know. Sun. 1m.	8.00
Baptisia Ex 'Starlite' and Ex 'Nelson's Navy'	Lucky Dip seedlings raised from 2 fine cultivars. Meaning, whatever plant you choose will be one of a kind, so you can name it! Sun. 90cm.	8.00
Baptisia x bicolor ex 'Starlight'	The parent plant has a two toned petal of violet and cream. The seedling should follow suit, but choose one in flower to be sure. Sun. 90cm.	8.00
Bergenia stracheyi 'Alba'	Very neat, small leaves, produces short spikes of white flowers that fade to palest pink. Charming. Sun / Part Shade. 25cm.	7.50
Berkheya purpurea 'Zulu Warrior'	An exciting newcomer, Its spiky leaves and stems are topped with large silver-lilac daisy flowers. A South African plant requiring good drainage. Sun. 60cm.	7.50
Betonica macrantha 'Superba'	Formerly Stachys, whorls of good sized rose-purple flowers over handsome, leafy clumps. A first class, bomb -proof plant suitable for lazy gardeners. Sun / Part Shade. 50cm. AGM.	7.50
Betonica officinalis 'Alba'	Formerly Stachys, a pretty short white favourite, and pert enough for the border front. Sun / Part Shade. 60cm.	7.50
Betonica officinalis 'Blush'	Formerly Stachys, tight clumps of crimped leaves topped with clusters of blush pink flowers. Very pretty, even in winter with its pert, preserved seed heads.Sun / Part Shade. 35cm.	7.50
Betonica officinalis 'Hummelo'	Formerly Stachys, plantsman Ernst Pagels' fine selection with spikes of lilac-purple flowers in mid-summer. Sun / Part Shade. 35cm. AGM.	7.50
Bouteloua gracilis	A strikingly unusual North American grass, its flowers break horizontally. One that will get noticed. Sun. 60cm.	7.50
Briza media 'Limouzi'	This 'Quaking grass' always steals hearts with its rustling, dark flowers on wiry stems. Sun.. 45cm.	7.50
Briza media 'Golden Bee'	A soft golden version of the Quaking Grass, flowering in June and July. Full Sun. 60cm.	
Bunium bulbocastanum	The native Great Pignut. A pretty white umbel with delicate foliage. The tubers and foliage are edible. Great on chalk. Sun / Part Shade. 45cm.	6.90

Calamagrostis brachytricha	A truly beautiful soft grass from Korea, the smokey purple plumes emerge in late summer then sparkle in the autumn dew. Sun / Part Shade. 1.2m. AGM.	7.80
Calamagrostis varia	European Reedgrass. The flowering purple stems fade to the colour of wheat and arch beautifully. Sun/ Part Shade. 60cm.	7.80
Calamagrostis x acutiflora 'Karl Foerster'	A vertical thrust of a plant, this bleached biscuit grass is like an exclamation mark in your borders! Sun / Part Shade. 1.8m. AGM	7.80
Calamintha subsp. nepeta	Loved by pollinators, becomes a buzzing bee heaven in summer with its massed pale blue flowers. Highly aromatic foliage. Sun. 30cm.	7.20
Calamintha subsp. nepeta 'Blue Cloud'	Flowers pale blue unabashed for months on the toughest of soils. Pulls in the pollinators and makes a refreshing tea. Sun. 30cm.	7.20
Calamintha subsp. nepeta 'White seedling'	A dainty white frothy cloud loved by pollinators. The young leaves make a refreshing tea. Sun. 30cm.	7.20
Camassia 'Marchants Dark Seedlings'	From a group of our own mixed seedlings in the garden, we have collected these bulbs. Deep, violet blue in colour, with large straplike leaves. A North American native growing in moist meadows in sun or part shade. 80cm.	8.00
Campanula patula	The spreading bellflower is becoming increasingly rare in the UK. Forming a rosette in the first year and lateral branches of pale blue, occasionally white bell flowers in the second. Will self sow on poor soil. Sun/Part Shade. 30cm.	6.90
Canna indica	A fresh green, lush and leafy plant with terminal spikes of small red and yellow flowers. The rhizomes need to be harvested and winter cosseted. Full Sun. 1.5m.	9.00
Carex elata 'Aurea'	Bowles's Golden Sedge demands retentive soil to prosper. Quite brilliant in its gold colouring, the flowers in contrast are almost black. Sun/Part Shade. 45cm. AGM.	7.80
Carex testacea	A bronze low-growing evergreen sedge, with fiery red hints in the autumn. Sun/Part Shade. 40cm.	7.80
Catananche caerulea	The beautiful 'Cupids Dart' thrives on mediterranean soils, with good drainage and full sun, so find an equally suitable spot if you can! 60cm.	7.20
Catananche caerulea 'Alba'	The white Cupids Dart, just as pretty in flower as its seedheads are in autumn. Needs good drainage and full sun. 60cm.	7.20

Cenolophium denudatum	Short of a better description, let's call this Parsley on Speed. Good ferny foliage, refined white flowers and a sympathetic candidate for more relaxed plantings. Sun / Part Shade. 1m.	7.50
Centaurea bella	A neat border front plant with silvery evergreen cut foliage and a generous summer display of lilac-pink flowers. Sun. 30cm.	7.50
Cephalaria dipsacoides	A looser form than C.gigantea forming a haze of tall pale yellow pincushions through late summer and equally valid for its wiry stems and seedheads through winter. Sun/Part Shade. 1.5m.	7.50
Cephalaria gigantea	A robust, handsome and long lived perennial, with pale yellow flowers, and a fine reputation as stalwart of the larger border. Sun. 2m+	7.50
Chaerophyllum hirsutum 'Roseum'	A charming mauve-pink Cow Parsley relative with lacey foliage smelling of apples. Likes a bit of moisture. Sun / Part Shade. 70cm.	7.50
Chamaenerion angustifolium 'Album'	The ethereal white flowers of 'Rose-Bay Willow-herb' always draw favourable comments unlike its terror striking running roots. Whatever - Bon courage! Sun / Part Shade. 1.5m	7.50
Chamaenerion angustifolium 'Stahl Rose'	The prettiest form of Rose-Bay Willow herb we think, pale pink with crimson calyxes. Exquisite – but how it runs! Sun / Part Shade. 1.6m	7.50
Chamaenerion dodonaei	A charming clump forming willowherb with slender greyish leaves and neatly chiselled large pink flowers. Needs good drainage. Sun. 60cm.	7.50
Chasmanthium latifolium	The intriguing flat flowers of Wood Oats are green on opening and persist in winter when they become copper flushed. Admire them in the garden or better still, pick them for the house. Sun/Part Shade. 80cm.	7.50
Chrysanthemum 'Dixter Orange'	A deeply satisfying orange, semi-double. Works wonders here in a mixed planted pot. Sun. 50cm	7.50
Chrysanthemum 'Heda'	Rare in cultivation. A deep madder red chrysanth with bright yellow centre. Flowering through October and November in Full Sun. 60cm.	7.50
Chrysanthemum 'Old White'	Elegant and airy, the small flowers burst from apricot buds and are more ivory than white. Sun. 80cm	7.50
Clematis viticella	The species. A beautiful nodding, small purple flowered climbing Clematis. Easy to grow and particularly dainty. Sun / Part Shade. 2m+	9.00
Clematis x diversifolia var. hendersonii	Large violet-blue flowers festoon this plant. With its naturally lax habit, it may require some gentle trussing up. Sun / Part Shade. 80cm.	9.00

Convallaria majalis 'Hardwick Hall'	A beautiful and vigorous 'Lily of the Valley' with larger flowers than most and particularly good broad foliage. Long grown at Hardwick Hall, Derbyshire. Shade. 30cm.	7.50
Coronilla valentina subsp. glauca 'Citrina'	This glaucous, leguminous shrub bears its remarkable display of sweetly scented pale yellow from winter through spring, but does demand a sheltered site. Sun /Part Shade.1.2m+ AGM.	7.50
Cortaderia selloana 'Pumila'	Pampas Grass. From refined, narrow leaved clumps, erupt dozens of cream coloured plumes, becoming a remarkable landscape feature. Sun. 2m. AGM.	12.50
Crocosmia 'Okavango'	Flowering for months, this clump forming crocosmia has dense heads of peachy-orange flowers. Sun / Part Shade. 75cm.	7.50
Crocosmia 'Paul's Best Yellow'	The substantial rounded golden-yellow flowers go hand in hand with a plant of strong constitution. Sun / Part Shade. 60cm. AGM.	7.50
Crocosmia 'Severn Sunrise'	Everyone comments favourably on the weird peachy-rose colour of this award winning plant. Terrific with purples. Sun / Part Shade. 60cm. AGM.	7.50
Crocosmia 'Walberton Red'	A incredible deep red with large flowers and dusky green leaves. The buds have a stripy effect before they open. Wants a bit of moisture in the soil. Sun/Part Shade. 75cm.	7.50
Cyclamen hederifolium	The classic Ivy leaved Cyclamen, dormant in summer, but an autumn/winter must-have. Shade / Part Shade. 10cm.	6.50
Cynara cardunculus 'Chelsea Physic'	A spiny, aggressive brute, presumably to keep animals at bay, with deeply incised leaves. Hard to beat for architectural presence. Sun. 1.8m.	7.50
Dahlia 'Brooding Scarlet'	Graham's latest selection. A magnificent, tall dark stemmed Dahlia with a scarlet single flower. Floriferous and strong. Sun. 2m.	8.00
Dahlia 'Cardinal Star'	Our own beautiful cardinal red single Dahlia. The large flowers radiate like stained glass. Sun. 2m.	8.00
Dahlia 'Mini Jaffa'	Hardy here in the border, the small rounded flowers are a chirpy Jaffa skin orange. Sun. 1m+	8.00
Dahlia coccinea	The Red Dahlia which sometimes isn't! A spectacular species most often orangey red, but from time to time yellow or orange. Choose when in flower unless you like to live on the edge! Sun. 60cm - 1.5m!	8.00

Dahlia merckii	A refined Mexican species with good cut foliage, small lilac flowers and central boss of yellow stamens. Blooms throughout summer and is capable of being hardy. Sun. 1m+	8.00
Delphinium requienii	A self seeding annual/biennial with fleshy lobed, glossy leaves and remarkable spires of soft blue-mauve flowers in summer . Sun. 2m+	7.20
Deschampsia cespitosa 'Tardiflora'	A Karl Foerster selection of the tufted hair grass, flowering more tardily than most, from July. Prefers a moist soil. Sun /Part Shade. 75cm.	7.80
Deschampsia cespitosa 'Goldtau'	Translates as Gold Dew which over a tuft of dark green foliage is what its myriad flowers mimic. Needs appropriate moisture. Sun/Part Shade. 75cm.	7.80
Dianthus 'Tatra Fragrance'	A low growing habit and striking red wheel spoke pattern to otherwise fragrant white flowers make for a charming pink. Good drainage. Full Sun. 25cm.	7.50
Dianthus 'Telhouet'	Plucked (with permission!) from a friends Breton garden where it made grey mounds covered in spiced clove scented vibrant pink flowers, semi double. An old French variety ?- who knows? Good drainage. Full Sun. 25cm	7.50
Dianthus ex 'Tatra Fragrance'	The parent has a striking patterned and scented form, from the Tatra Mountains. So there could be some interesting markings on these seedlings. Good drainage required. Full Sun. 25cm.	7.50
Dianthus carthusianorum 'Tall Form'	Considerably taller than the type, but with grey foliage and the same startlingly bright pink flowers. Good drainage. Full Sun. 90cm.	7.50
Dianthus deltoides 'Leuchtfunk'	Saturated crimson flowers, like splashes of blood over a mat of deep green foliage. Full Sun. Good Drainage.20cm.	7.50
Diascia 'Coldham'	A gentle pale-pink long flowering Twinspur. Great in pots or on well draining soil. Sun. 20cm.	7.50
Diascia 'Emma'	Narrow leaved suckering clumps and a profusion of dusky deep pink flowers. Exactly what we expect of these marvellous, long flowering plants. Sun.30cm	7.50
Diascia intergerrima 'Blush'	A long flowering Twinspur. White with a pale pink centre and a trailing habit. Perfect in pots. Full Sun. 30cm	7.50
Dictamnus albus	The resinous, aromatic Dittany of Crete in its orchid like glistening white form. A long lived plant, unless you have slugs! Good drainage. Full Sun.90cm.	8.20

Dierama pulcherrimum	'Venus' Fishing Rod'. Rosy lilac-mauve bells, sometimes paler, are elegantly held on wand like arching stems. Hearty, retentive soil gives best results. Sun. 1.5m.	7.80
Dierama pulcherrimum 'Pale Pink'	Delicate pale pink bells seem to float in the air above the grass-like foliage of this 'Angel's Fishing Rod'. Likes full sun and a fertile soil. 1m.	7.80
Dierama pulcherrimum Ex 'Blackbird'	Seedlings of the strong, purple-red Angel's Fishing Rod. With evergreen, tough leaves, and yet the daintiest of flowers that dance in the wind. Sun. 1.2m.	7.80
Digitalis ferruginea	Baggy pale caramel flowers with a pouting lip. Dark sentinel spikes in winter. Sun/Part Shade. 75cm.	7.50
Echinacea purpurea 'Rubinstern'	Large purple-pink flowers, lasting for months and covered in bees and butterflies. Good drainage. Sun. 80cm.	7.20
Echinops bannaticus 'Blue Globe'	A coarse plant in leaf maybe, but worth growing for the blue, insect-attracting globes alone. Tolerant of most soils. Sun/Part Shade. 1.2m.	7.50
Echium russicum	Native to the Ukrainian Steppe, this red 'Vipers Bugloss' is a magnet for pollinators and great for chalk. Long flowering. Full Sun. 60cm.	7.50
Elymus magellanicus	South American 'Rye Grass', with blades the colour of steel. Complements purple flowering plants beautifully. Full Sun. 50cm.	7.50
Epilobium canum 'Ed Carman'	Bright orange-red, long trumpets of flower with neat grey-green foliage climbing the stem. Flowers from July. Good drainage. Sun. 40cm.	7.50
Epimedium 'Rose Queen'	Pale pink long spurred flowers emerge from the heart-shaped foliage which is bronze when young. Part Shade. 25cm.	7.50
Epimedium 'Bieke'	Masses of spidery lemon yellow flowers. Repeat flowering into summer. Evergreen. Part Shade. 30cm.	7.50
Epimedium 'Egret'	One of the best hybrids with fat white sepals and an underskirt of clean yellow petals. Evergreen. Part Shade. 30cm.	7.50
Epimedium 'Marchants Twin Set'	Our own pukka seedling with tubby bicoloured flowers of crimson-purple and lilac pink. Part Shade. 20cm.	7.50
Epimedium 'Peachy'	A Marchant's hybrid with hints of pink and yellow. Charming. Part Shade. 25cm.	7.50
Epimedium × warleyense 'Orangekönigin'	The small flowers of this selected form are burnt orange adding a quite different tone to this genus. Evergreen. Part Shade. 40cm	7.50

Epimedium grandiflorum nanum	The smallest of the Epimediums we grow. A delight. Part Shade. 10cm.	7.50
Epimedium versicolor 'Sulphureum'	Handsome evergreen foliage, copper and crimson tinted in winter, which should be removed in February to enjoy the clean yellow flowers in spring. Part Shade. 40cm.	7.50
Epimedium x perralchicum 'Frohneiten'	Airy panicles of unspurred lemon yellow flowers in spring. The handsome evergreen leaves remain unblemished throughout winter, making it an altogether classy garden plant. Part Shade. 35cm.	7.50
Eragrostis curvula	By mid-summer the flowering stems knit together into a billowing airy mass which persists long into the winter months. Full Sun. 90cm.	7.50
Erigeron 'Dignity'	Large, aster like flowers with elegant narrow ray petals. Good for the border front. Pale violet. Sun. 30cm.	7.50
Erigeron 'Quakeress'	The narrow lilac-pink ray petals make for a dainty fringed flower effect. An old hybrid yet to be superseded. Sun. 60cm.	7.50
Erigeron karvinskianus	An obliging daisy, whose white flowers age to deep brick-pink, born for months on end. Will seed itself surreptitiously and cannily. Sun / Part Shade. 20cm. AGM.	7.20
Erodium x kolbianum	This smart Storksbill possesses filigree silver foliage and palest lilac-pink flowers with a pair of dashing black eyes. Good drainage. Sun. 10cm.	7.50
Eryngium bourgatii 'Fine Form'	A form with particularly deep metallic blue flower heads and bracts. In the wilds of the Pyrenees and Picos mountains it grows in poor, stony soil. Full Sun. 60cm.	7.50
Eryngium ebracteum var. poteroides	A plant whose mimicry fools almost every gardener into thinking it's a Sanguisorba. The slender burr-like purple-maroon flowers are sparsely held on a tracery of wiry stems through summer / autumn. Full sun. 1.2m	7.50
Eryngium eburneum	Sturdy green stems hold sprays of tufty white thimbles, that fade well into autumn. A stunning plant. Full Sun. 1m. AGM.	7.50
Eryngium giganteum	The best and most silvery selection of this species collected in the Pontic Alps of Turkey. Biennial. Sun. 80cm. AGM.	7.50
Eryngium pandanifolium	Of great architectural presence, in September flowering trunks rise over sword shaped leaves terminating in a branched network of small maroon-purple flowers. Full Sun. 2.5m	9.00

Eryngium planum	An unfortunate name for such a good garden plant. Always provides a reliable, generous display of its small silvery-blue flowers and self seeds delightfully. Sun. 1m.	7.20
Eryngium x zabelii 'Cobalt Star'	All in the name, an impeccable star from Elizabeth Mc Gregor of the most glorious, eye catching Cobalt Blue. Sun. 1m.	7.50
Eryngium yuccifolium	The Rattle Snake Master! From the American prairies, round greeny white flowers are held on strong branched stems above spiky leaves. Attractive to wildlife, but not snakes! Full sun. 1m.	7.50
Eucomis comosa 'Sparkling Burgundy'	The deep matt purple succulent Pineapple Lily. Hardy for us, but worth a good mulch in harsher winters. Give it some room. Sun. Up to 1m.	7.50
Eucomis pallidiflora	A fantastical, succulent creation. Basal leaves, stem and palest green flowers all topped with a Pineapple like flourish. Sun. 90cm.	7.50
Eucomis pallidiflora 'Purpurea'	Syn. E. Pole-evansii 'Purpurea'. Large strap like leaves with a purple hue, give rise to sturdy stems with a pineapple on top - or a raceme of flowers that looks like one! Sun. 90cm.	7.50
Eupatorium purpureum maculatum 'Orchard Dene'	Stood out like a sore thumb in the Wisley trials, with its huge heads of showy purple pink flowers and dark stems and deservedly awarded an AGM. A pollinator magnet. Sun/ Part Shade. 2m+	8.00
Euphorbia 'Abbey Dore'	Zingy lime bracts, above fine blue-green leaves. Flowers all summer long. Full Sun. Free draining soil. 50cm. AGM.	7.50
Euphorbia cornigera	A border stalwart. A long succession of vibrant lime green flowers appear on branching heads. This form is upright on wonderfully dark stems. Sun/ Part Shade. 90cm.	7.50
Euphorbia donii	The refined line and detail of this Himalayan spurge together with its long flowering period lifts it, we think, above its peers. Sun /Part Shade. 1.2m.	7.50
Euphorbia dulcis 'Chameleon'	The deep maroon foliage makes for a wonderful contrasting plant to play with greens and silver. With dots of a yellow flower in the summer to complete the rainbow effect. Sun/Part Shade. 30cm.	7.50
Euphorbia epithymoides 'Midas'	Not difficult to imagine the bracts and flowers of this brilliant spring flowering plant having been touched by King Midas' hand and consequently turned to Gold. Sun/Part Shade. 45cm.	7.50

Euphorbia griffithii 'Fern Cottage'	A very good form with decorative fiery reddish-orange flower bracts. Would liven up any late spring border. Part Shade. 90cm.	7.50
Euphorbia seguieriana ssp. niciciana	The attractive Medusa-like mound of fine glaucous leaves and wirey stems is enhanced by a long season of small heads of chrome yellow flowers. A showy front liner but craves good sun. 45cm	7.50
Euphorbia x arendsii	A cross between wallichii and griffithii 'Dixter'. Blessed with lush growth, good autumn colour and a long succession of copperorange bracts/flowers in summer. A class act. Deciduous. Sun. 1.2m.	7.50
Eurybia divaricata	Wiry black stems support a shower of small narrow rayed, white daisies from August onwards. Sun/Part Shade. 40cm.	7.50
Ferula communis ssp. glauca	A spectacular fennel climaxing (after 3 years) in a towering display of yellow ochre flowers in umbels on anything but 'umble' fat, glaucous stems. Breath taking against a blue summer sky. Sun. 3m.	7.80
Filipendula vulgaris 'Multiplex'	Over cut, carrot like basal foliage, stems carry creamy-white clouds of tiny double flowers. A charming plant of Cottage Garden character. Sun/Part Shade. 45cm.	7.50
Foeniculum vulgare 'Smoky'	Bronze Fennel. A good deep bronze seed strain with a marked bloom to the young stems. Full Sun. 1.5m	7.50
Fuchsia 'Hawkshead'	An elegant, hardy Fuchsia with white flowers, the petals tipped with a hint of a tint of green. The most popular Fuchsia we grow. Sun/Part Shade. 75cm	7.50
Fuchsia 'White Knight's Pearl'	Pale pearlescent pink sepals, with a darker pink petals hanging below. Beloved by all. Sun/ Part Shade. 80cm. AGM	7.50
Fuchsia magellanica 'Thompsonii'	Wonderful in its full glory in late summer. The slender red and purple flowers held on arching stems associate beautifully with blue Agapanthus. 150cm +. Sun /Part Shade. AGM	7.50
Fuchsia microphylla	A sweetie-pie possessing the smallest leaves and flowers (bright shocking pink) of those we grow. Sun/Part Shade. 60cm.	7.50
Gaillardia aristata	Often vulgarised with overbreeding, the species has a simple straw-yellow flower with a red centre. In its native US, it thrives on a poor infertile soil. Full Sun. 70cm.	7.50

Gentiana asclepiadea	The Willow Gentian. Tubular blue ridged flowers stare out from deep green pointed foliage on elegant arching stems. Partial Shade. 90cm. AGM.	7.50
Geranium 'Brookside'	We find this a less vigorous plant than some of the blues, but it more than compensates with the size, colour and sheer quality of its flowers. Sun /Part Shade. 40cm. AGM.	7.20
Geranium 'Femme Fatale'	Deep purple cut foliage (from G:'Nimbus' parentage) and pretty bright blue flowers makes for an unusual combination in a geranium. And so much the better for it! Sun/Part Shade. 40cm.	7.20
Geranium 'Khan'	A G. sanguineum hybrid, supposedly. The flowers are deep bright pink and very large. One of the best. Sun/ Shade. 30cm.	7.20
Geranium 'Sirak'	One of the best hybrids, producing masses of notched, large lilac-pink flowers over a dense clump of foliage. Sun/Part Shade. 45cm. AGM.	7.20
Geranium 'Nimbus'	Produces masses of pale violet-blue flowers over handsome cut foliage for most of the season. Sun / Part Shade. 50cm. AGM.	7.20
Geranium 'Orion'.	A super hybrid from Holland with enormous violet-blue salvers. Stands apart in a Geranium crowd. Sun/ Part Shade. 50cm. AGM.	7.20
Geranium erianthum	The wooly cranesbill, due to its soft flat leaves. An early flowerer with 10 pence sized mid blue flowers. Good in shade. 30-40cm.	7.20
Geranium himalayense 'Derrick Cooke'	Large white flowers with exquisite pink veining are held aloft above the apple green deeply cut foliage from early summer until September. Sun/Part Shade. 40cm.	7.20
Geranium macrorrhizum 'White-Ness'	Easy sun or shade creeping groundcover. Apple green emerging foliage and the purest white flowers. 30cm. AGM	7.20
Geranium nodosum 'Whiteleaf'	A sweet little scrambler. Flowers have a rosy pink centre, fading to white round the edges. Sun/ Shade. 30cm.	7.20
Geranium phaeum 'Lisa'	Sulphur yellow and white zonal leaf markings in early spring. Flowers being typically violet-purple. Good for dry shade. 60cm.	7.20
Geranium phaeum 'Marchants Ghost'	Our own chance seedling with 'ghostly' pale grey-lavender flowers the texture of satin. Greatly admired here last year. Good for dry shade. 60cm.	7.20
Geranium phaeum 'Under The Willow'	These G.phaeums do seed about, and with so many of you asking what the one under the Willow is, we thought we'd dig them up and sell them to you! Shade. 60cm.	7.20

Geranium pratense 'Southeast Celestial'	Wonderful huge cupped salvers of luminescent lavender-blue. A chance seedling from Adrian Orchard of Southeast Plants – lucky devil! Sun. 60cm.	7.20
Geranium sanguineum 'Album'	The Bloody Cranebills, a native plant, in its pristine pure white form. Easy to please and very adaptable. Sun/ Shade. 30cm.	7.20
Geranium sanguineum var. Striatum	Large, rounded pale pink flowers stud the low mound of foliage, all summer through. Sun/Shade. 10cm	7.20
Geranium wallichianum 'Edinburgh Botanic Garden'	A very beautiful late summer Cranesbill with lightly veined pale silvery blue flowers. Branching habit, spread 1m. Part Shade.	7.20
Geranium wallichianum 'Hexham Velvet'	A vigorous scrambler with magenta upward facing flowers. Long flowering. Full Sun /Part Shade. 30cm.	7.20
Geranium sanguineum 'Elke'	This form possesses the expected bright pink flowers of a Bloody Cranesbill, but differs in having a small white eye and a pale pink picotee edge. Very pretty but needs a little shade. 15cm.	7.20
Geum 'Bell Bank'	Large, telling copper-pink hanging flowers seemingly form a troupe of suspended tutus. Shade. 40cm.	7.20
Geum 'Borisii Seedling'	This arose out of a clutch of seedlings of G. 'Borisii'. It is a softer orange, has notched petals and yellow stamens and is very pretty indeed. Sun/Part Shade. 30cm	7.20
Geum 'Café au lait'	Not the strongest cup of coffee you will see and maybe even more Peach Lassi. Take your pick! Part Shade. 25cm	7.20
Geum 'Dawn'	Flowers freely enough, soft yellow with apricot orange tints. From Geum collection holder Sue Martin. Sun/ Part Shade. 40cm.	7.20
Geum 'Lisanne'	A strong selection from the continent with cheering, large yellow flowers. Sun/Part Shade. 40cm	7.20
Geum 'Marmalade'	Pleasing copper-orange flowers, a colour gardeners often ignore but we think it utterly enlives a border. Sun/Part Shade. 30cm.	7.20
Geum 'Mrs Bradshaw'	Semi-double bright red flowers from June to September. Looks beautiful with a low growing grass - a deschampsia perhaps? Sun/Part Shade. 60cm. AGM.	7.20
Geum 'Borisii'	A reliable 'doer' with clean tangerine-orange flowers. May flower again later in the season. Sun. 20cm.	7.20

Gillenia trifoliata	A long lived perennial with masses of delicate, star-like white flowers. Tolerant of dry shade or moist sun! 70cm. AGM.	7.50
Gladiolus 'David Hills'	A gorgeous hybrid of uncertain parentage, its modest sized red flowers are flame yellow within. Not to be confused with rhubarb and custard. Sun. 60cm	7.50
Gladiolus 'Ruby'	A ravishing rich ruby red, even darker in the throat. Clumps moderately. Glorious. Sun. 60cm	7.50
Gladiolus papilio	A melange of celadon, grey and dusky rose pink suffuse the hooded flowers creating a plant of remarkably restrained beauty. Sun. 80cm	7.50
Gladiolus tristis	Small flared scented primrose yellow flowers in early summer. A far cry from the gross flowers bred for the cut flower trade. Fine grass-like winter green foliage dormant by late summer. Sun. 60cm.	7.50
Glandularia 'La France'	Formerly Verbena. Domed heads of bright lilac-mauve flowers for months. A plant that weaves its way. Sun. 45cm.	7.20
Glaucium flavum fulvum	The 'Horned Sea Poppy' in its pale tomato red form with handsome silvery rosettes – good the year round. Sun. 45cm.	7.50
Glycyrrhiza yunnanensis	Tall self-supporting bronze stems with highly decorative pinnatifid pea foliage. Pale lilac clover flowers are followed by gladiator spiked-mace seed heads! Grow your own Christmas decorations. Sun/Part Shade. 2m.	7.80
Hakonechloa macra 'Albostriata'	Forming soft mounds of stripy green leaves, this Japanese grass has a great effect en mass in the shade. Good soil needed. 30cm.	7.80
Hedychium 'Tara'	With slimline strap leaves and spikes of orange orchid like blooms in September, this Himalayan Ginger brings a touch of the exotic to the border. Give it a mulch to get it through the winter. Sun/Part Shade. 2m+ AGM.	12.00
Hedychium densiflorum 'Assam Orange'	A hardy Ginger whose spikes of orange flowers add a touch of exoticism to the late summer border. Long season of foliage interest. Sun/Part Shade. 90cm.	12.00
Hedychium spicatum 'Tibet Form'	Exotic foliage and spikes of yellow flower are followed by cheering red fruits perched in orange lined seed pods. Prefers a shady spot. 70cm.	12.00
Hedysarum coronarium	The wayward spreading stems of this legume will be forgiven when it comes to enjoying the abundant rich wine-crimson flowers over the summer months. Give it an open spot in Sun. 60cm.	7.50

Helenium 'Dunkle Pracht Mk II'	Deep rust-red flowers. This 'Dark Beauty' stole the show in our long border, during the heat of 2023. Sun. 1.3m.	7.50
Helenium 'Rauchtupas'	Sunshine yellow on top and scarlet red underneath like a two tone rara skirt. Will flower for months with a little deadheading. Sun. 1m.	7.50
Helenium 'Riverton Beauty'	Clear butter yellow flowers and prominent brown cones like sunshine on a stick. Sun. 1m.	7.50
Helenium 'Sahin's Early Flowerer'	Fantastic long display of large flowers, a mixture of burnt orange and ochre yellow. The first Helenium in flower. Sun. 1.2m. AGM.	7.50
Helenium 'Tie Dye'	Characterful quilled yellow flowers, purplish red on their underside looking subtle from afar, but deserving close inspection. Sun. 90cm.	7.50
Helenium 'Rubinzweg'	Rich, deep mahogany-red flowers over a long season on a plant of short stature make this a valuable addition to the range. Sun. 75cm. AGM.	7.50
Helianthemum 'Cheviot'	A low growing evergreen shrub with grey foliage and large flowers the colour of pale water melon flesh. Full Sun. 20cm.	7.50
Helianthemum 'Henfield Brilliant'	Blazing vermilion red flowers and leathery grey-green leaves. An evergreen low shrub that flowers for months. Drought tolerant. Sun. 30cm. AGM.	7.50
Helianthus 'Lemon Queen'	This variety of Sunflower sings out in its quality and generosity of its autumn crop of large pale lemon daisies. Sun. 2m. AGM.	8.00
Helianthus orgyalis	The willow leaved sunflower. A beefy imposing plant with large lemon yellow flowers are carried on dark stems. Full Sun. 1.5m +	8.00
Helictotrichon sempervirens	A classic grass, forming a tufted mound of steel grey foliage. The stems bow gracefully under the sheer weight of the flower panicles. Sun and drainage. 70cm. AGM.	8.00
Hemerocallis 'Crimson Pirate'	Quite a neat little Day Lily with crimson petals and a yellow star in the centre. Sun/Part Shade. 80cm.	7.80
Hemerocallis 'Laughton Tower Mk II'	A tall apricot orange Daylily with a flush of mahogany brown. A successful hybrid raised here at Marchants. Sun/Part Shade. 1.2m	7.80
Hemerocallis 'Margery Fish'	A gorgeous sunny orange, pairs perfectly with our dark agapanthus. What a joy! Sun /Part Shade. 1m.	7.80
Hemerocallis 'Red Butterfly'	This velvety blood red day lily stops our customers in their tracks. Masses of large flowers. Sun/Part Shade. Moisture retentive soil. 1m.	7.80
Hemerocallis 'Corky'	Zesty, lemon yellow flowers from wiry mahogany stems and buds. Never disappoints. Sun/Part Shade. 60cm.	7.80

Hemerocallis 'Stafford'	Large mahogany-red flowers of ravishing quality. An exemplary old hybrid which still holds its own in the Daylily stakes. Sun /Part Shade. 1.2m. AGM.	7.80
Hemerocallis citrina (x ochroleuca)	Possesses all the grace you'd expect of a species daylily. Pale lemon-yellow narrow trumpet flowers and a sweet scent. Sun/ Part Shade. 70cm.	7.80
Hesperantha 'Marchants Seedling'	Verging towards coral in colour, this is a seedling of H.'Zeal Salmon' and is slightly deeper in colour. Large flowers. Sun. 70cm.	7.50
Heuchera 'Brownfinch'	A favourite of ours, with silver mottled, green leaves and a generous crop of terracotta spikes of flower throughout the summer. Pollinator magnet. Sun /Part Shade. 60cm.	7.50
Heuchera 'Green Spice'	Burgundy veined silver green leaves with pale pink dainty flowers. Glorious autumn coloured foliage. Part Shade/ Shade.40cm. AGM.	7.50
Heuchera americana 'Harry Hay'	Rich purple foliage and creamy flowers. A large form with open structure. Part Shade. 70cm	8.20
Heuchera sanguinea 'Alba'	Excellent garden plant yet is rarely met with. Wonderful ivory flowers age with remarkable grace. Early summer onwards. Sun/Part Shade. 60cm	7.50
Heuchera villosa 'Autumn Bride'	The bold hairy foliage of this striking plant catches folk out. From August on, myriad white flowers appear on lofty spikes. 'Oh, it's a Heuchera'- all is well with folk again. Part Shade. 1m.	7.50
Iris 'Benton Menace'	A lavish beauty with royal purple falls, and a golden throat to entice those bumblebees. Named after Sir Cedric Morris' Cat. Full Sun. 80cm.	7.50
Iris Old Dutch Variety (Bearded)	An old variety received from a private garden, sumptuous with its pale purple standards, and yellow/white crested velvety black-purple falls. Ravishing! Bake in sun! 60cm	7.50
Iris sibirica 'Berlin Bluebird'	A very striking colour, as near Gentian blue as you will find in a sibirica. Uncommon. Moisture retentive soil. Sun/Part Shade.75cm	7.50
Iris sibirica 'Butter and Sugar'	Flowers of good substance in an eye-catching combination of butter yellow and white. Moisture retentive soil. Full Sun.60cm.	7.50
Iris sibirica 'Southcombe White'	Graceful white flowers, not large, with ghostly grey veining. Moisture retentive soil. Sun/Part Shade.90cm	7.50
Iris sibirica 'Summer Sky'	A graceful slim-line flower, like a dancer on points, lavender blue with just the right amount of yellow for perfect balance. Moisture retentive soil. Sun/Part Shade.90cm	7.50

Iris sibirica 'Tropic Night'	Intense violet-blue with a pale zone on the haft of the falls. Moisture retentive soil. Sun/Part Shade.90cm.	7.50
Iris x robusta 'Gerald Darby'	The intense purple staining of the new foliage of this iris is quite unlike any Iris we know and can be used to dramatic effect in the garden. Moisture retentive soil. Sun/Part Shade. 90cm.	7.50
Kalimeris incisa 'Charlotte'	Single Aster like flowers in light lavender blue, that flower for weeks on end from June onwards. Sun. 75cm.	7.50
Kalimeris pinnatifida 'Hortensis'	A pretty form this one. The pale washed lavender flowers are double (looking like a chrysanth) with a pale yellow eye. Sun/Part Shade. 90cm.	7.50
Knautia macedonica	Pin cushions of wine red, float on wiry stems above soft green leaves. Needs well drained soil. Sun /Part Shade. 80cm.	7.50
Kniphofia 'Ice Queen'	A strong white kniphofia with a lime green tinge. Flowering from July onwards. Sun. 1.2m.	7.50
Kniphofia 'Nobilis'	A whopper of a Poker, with large fire coloured flowers from August onwards. Ready to make a statement? Full Sun. 2m.	8.20
Kniphofia 'Wol's Red Seedling'	A short brick-red variety with slender spikes in August and September. Sun. 60cm.	7.50
Kniphofia 'Sunningdale Yellow'	Clear yellow with a smidgen of ochre. First poker off the blocks in June. Classy. Full Sun.90cm. AGM.	7.50
Lathyrus grandiflorus	The largest flowered of them all, with purple and carmine flowers but alas, no scent. A great scrambler. Sun. AGM.	7.80
Leucanthemella serotina	The Hungarian Daisy survives with glee here, muscling its way through our unforgiving clay and rewarding us with a brilliant late display of pretty white daisies. Sun/Part Shade. 2m. AGM.	7.50
Liatris pycnostachya	Unusual tall fluffy spikes of purple flower from the American Prairies. The tallest of the Blazing Stars! Full Sun. 1.3m+	7.50
Liatris spicata	The 'Blazing Star' of the North American prairie unfolds its spikes of violet-mauve flowers from top to bottom. Needs good drainage and full sun. 60cm.	7.50
Limonium platyphyllum 'Robert Butler'	Sea lavender. Clouds of tiny purple-blue flowers from silvery buds – a florist's delight. Good drainage. Sun. 30cm	7.20
Linaria 'Steely Belle'	Our own toadflax seedling. Pewter grey flowers and glaucous foliage. Needs free draining soil and full sun. 1m.	7.20

Linaria genistifolia W&G BG B6	Fine narrow stems of soft green and lemon yellow, mingle about and gently set seed, adding a zing to any planting. Sun. 80cm.	
Lobelia laxiflora var. angustifolia	A curious species from Arizona looking vaguely Penstemon like in leaf, but with cheering bright red tubular flowers, yellow in the throat. Full sun. 75cm.	7.50
Lobelia tupa	A classy, eye catching plant with pale, sage-green leaves and dark stems terminating in a spike of claw shaped cherry red flowers. Needs retentive soil and some shelter but worth every effort. Sun. 1.2m.	7.50
Luzula nivea	Snowy Wood Rush is clump forming, easy to please evergreen and valued for its quiet, charming display of white flower clusters in early summer. Shade. 60cm.	7.50
Luzula sylvatica 'Marginata'	The cream leaf margins of this evergreen Wood Rush make for a refined plant, made even better when topped by a haze of reddish brown flowers in early summer. Shade. 40cm. AGM.	7.50
Lychnis coronaria	The retina blasting colour of the crimson-magenta flowers is almost without parallel. Soft silver leaves. Self seeds. Sun/Part Shade. 80cm.	7.20
Lychnis coronaria 'Alba'	The pure white form, for those who wish not to be shocked! Still with those silver velvety leaves. Sun/Part Shade. 80cm.	7.20
Lythrum salicaria 'Ziegeunerblut'	The vivid magenta-purple flower spikes on red tinted stems are a pollinator magnet. Perfect for planting round the pond. Moisture retentive soil. Sun. 1.2m.	7.20
Lythrum virgatum	The branched stems and fine foliage of this widespread European and Asian species carry myriad small, deep lilac-pink flowers for weeks in summer. Srought tolerant. Sun. 90cm	7.20
Lythrum virgatum 'Pale Form'	A strong constitution but delicate and beautiful to look at, and very long summer flowering. The flowers create a haze of palest pink, looking charmingly natural. Sun. 70cm.	7.20
Maianthemum racemosum	False Solomon's-seal. Glorious sweet smelling plumes of white fluff held above large ribbed leaves. Flowers in April/May. Shade. 60cm.	8.20
Matthiola incana 'Alba'	Perennial white stock. Deliciously scented, the pure white flowers are enhanced by the grey foliage. Loved by moths. Good drainage required in full sun. 50cm.	7.50

Melica uniflora f.albida	The Wood Melick creeps about benignly, its spikelets spangled with tiny bead like white flowers. Understated and utterly charming. Shade. 40cm	7.50
Miscanthus nepalensis	This possesses the most beautiful flowers of any Miscanthus. Small fountain-like tresses of braded gold silk. Dislikes winter wet. Sun. 1.2m	10.00
Miscanthus sinensis 'Arabesque'	A perfect name for this graceful plant, with narrow leaves and tawny flowers breaking 70cm above the foliage, like a true ballerina on point. Sun. 2m.	10.00
Miscanthus sinensis 'China'	One of the darkest miscanthus, with a blaze of autumn colour and later flowering than most. Sunlight brings out the best colouring. Sun. 1.5m. AGM.	10.00
Miscanthus sinensis 'Dixieland'	A variegated Miscanthus for those who like a stripe! With a soft pale pink flower, this plant is all about the dramatic foliage. Sun. 1.8m.	10.00
Miscanthus sinensis 'Rosi'	A very handsome Miscanthus, bolt upright and with a dark, smouldering look about it. Fine autumn colour comes as a bonus. Sun. 2m+.	10.00
Miscanthus sinensis 'Beth Chatto'	The last Miscanthus from Ernst Pagels, nostalgically named after his dear friend. The very fine leaves arching at their tips and narrow light brown flowers make for an elegant grass. Sun. 1.5m+	10.00
Miscanthus sinensis 'Flamingo'	A cultivar with extremely beautiful pendulous, purplish pink flowers. The more sun you give it, the more flowers there will be. Sun. 1.8m. AGM.	10.00
Miscanthus sinensis 'Ghana'	A distinct narrow habit, upright brown flowers and superb reddish-purple foliage make this a real winner. Sun. 2m. AGM.	10.00
Miscanthus sinensis 'Kleine Fontane'	Atop of thin silver leaves form drooping flower heads in shimmering pink. This is indeed a very beautiful 'Small Fountain'. Sun. 1.2m. AGM.	10.00
Miscanthus sinensis 'Malepartus'	Dramatic, upright spikes of purple flowers in bold contrast to the broad, arching leaves. The foliage takes on glorious amber/apricot tints in late Autumn. Sun. 2m.	10.00
Miscanthus sinensis 'Rotfuchs'	Meaning 'Red Fox', Its deep rust-red narrow plumes, fade to a bleached charcoal-purple. A strong beefy plant. Sun. 2m.	10.00
Miscanthus sinensis 'Yakushima Dwarf'	Extremely productive, casting up masses of golden plumes. Its narrow foliage, compact habit and upward thrust, lends it to 'Punctuation' planting. A classy number. Sun. 1.2m	10.00

Molinia caerulea ssp. arundinacea 'Bergfreund'	Tiny bead like flowers in silvery brown create a floral mist and are at their most entrancing when suspended with droplets of water after rain. Sun/Part Shade. 2m.	8.50
Molinia caerulea ssp. Caerulea 'Heidebraut'	A mid -height Molinia, good and compact and stands up well in a rain shower, when it will glisten with moisture. Sun/Part Shade. 1.2m.	8.50
Molinia caerulea subsp. arundinacea 'Karl Foerster'	Handsome purple flower inflorescences. The perfect choice for a one man show at the border front! Highly recommended. Sun /Part Shade. 1.8m.	8.50
Molinia caerulea subsp. caerulea 'Black Arrows'	Fabulously dark flowers and stems on this upright Purple Moor Grass from July to November. Sun/Part Shade. 1.2m.	8.50
Molinia caerulea subsp. caerulea 'Dark Defender'	Marina Christopher's selection has proved itself a real star, the dark bronze heads unusually persisting and standing upright well into winter. Sun/Part Shade. 90cm.	8.50
Molinia caerulea subsp. caerulea 'Dauerstrahl'	Few are the summer days when its soft arching beauty isn't appreciated at the border front. Sun/Part Shade. 70cm.	8.50
Molospermum peloponnesiacum	A rather sophisticated perennial umbellifer with sharply etched fernlike foliage. The yellowish heads of flowers and handsome seeds are carried on stout stems. Sun. 1.2m.	7.50
Nepeta 'Florina'	A soft pale pink Catmint with a darker calyx, adored by bees. Long flowering season. Full Sun. 50cm	7.50
Nepeta grandiflora	This is the type species with good deep blue flowers and a somewhat leafy habit. Hails from the Caucasus. Full Sun. 70cm.	7.50
Nepeta nuda 'Romany Dusk'	Paul Barney's (Edulis) collection, noted for its suave dark stems and almost white flowers. Sun. 90cm. AGM.	7.50
Nepeta racemosa 'Walker's Low'	A Tomcat of a Catmint with a vigour to match. Deep lavender-blue flowers. Cut back after its first flowering, for a second flush. Sun.60cm.	7.50
Nepeta racemosa 'Toria'	Our lowest growing nepeta, perfect for a froth of pale blue flowers, spilling over a path edge in the sunshine. Sun. 30cm.	7.50
Omphalodes cappadoccica seedling	A little seedling found below the hedge which looks suspiciously like 'Cherry Ingram'. Let's see if the flower is the deep denim blue of its parent. Part Shade. 30cm.	7.50

Origanum 'Bristol Cross'	An O. laevigatum hybrid with long pink and chartreuse pipes of interlocking bracts held at right angles to the wiry 30cm high stems. Unusual and reliable. Sun. 30cm.	7.50
Origanum laevigatum 'Hopleys seedling'	Small glaucous leaves on branched wiry stems support a plethora of rosy-purple flowers. A bee-puller par excellence. Sun. 45cm. AGM	7.50
Origanum laevigatum hybrid	A beefier laevigatum with rose-purple flowers. Bring on the pollinators! Full Sun. 50cm.	7.50
Ornithogalum pyramidale 'Short Form'	Masses of white, green striped flowers are borne on spikes in May-June. A charming, uncommon and sterile form. We are trying it in grass. Sun. 30cm.	7.50
Orthrosanthus polystachyus	Hailing from Australia, this hardy perennial holds its pale blue star flowers along the stem, rising above the grass like foliage in May / June. Sun/Part Shade. Good drainage. 50cm.	7.50
Paesia scaberula	New Zealand ring fern but not for Arctic planting. When happy, creeps about forming a mound of extremely fine fronds noted for their bright, pale green colour. Part Shade. 20cm	7.80
Panicum virgatum 'Black and Blue'	An apt name for this superb drought tolerant grass, with dark streaked leaves which colours further into the autumn. Full Sun. 1m.	8.50
Panicum virgatum 'Strictum'	Bolt upright with a particularly airy flowering inflorescence. We love it! Sun. 1.2m.	8.50
Panicum virgatum 'Cloud Nine'	The tallest of the US switch grasses. A robust and upright grower with striking blue foliage and pink panicles of flowers. An unbeatable feature grass. At its best in good retentive soil. Full Sun. 2m+ AGM.	8.50
Panicum virgatum 'Heavy Metal Mk II'	A seedling of 'Heavy Metal' which has grown stronger than its parent, but with all the attributes, particularly the grey foliage. Drought tolerant. Sun. 1.2m.	8.50
Panicum virgatum 'Shenandoah'	The foliage contains almost all the colours of the rainbow as it matures, and holds particularly dark red flowers. Sun. 1m.	8.50
Panicum virgatum 'Warrior'	Produces a great misty head of ruby flower spikelets that remain attractive in winter. Has a floppy habit. Sun. 1.2m. AGM	8.50
Panicum virgatum 'Northwind'	We so enjoy this plant with its strong vertical habit, forming a green column in the border. Good bronze and copper tints in autumn too. Sun. 1.2m. AGM.	8.50

Papaver orientale ssp paucifoliatum	An uncommon sub-species of Oriental Poppy with large saucer shaped flowers of glowing orange-vermilion. Graham's collection from a 'Biblical' meadow in Armenia, 2004. Sun. 60cm.	7.50
Parathelypteris beddomei	A narrowly pointed fern, good for groundcover. Rare in gardens here and hails from S.E. Asia/Taiwan. Charming. Shade.25cm.	8.50
Parthenium integrifolium	A member of the Aster family, but with tightly scrunched up flowers forming an umbel like effect. Branched stems add to the architectural effect of this ivory white flower. Flowers lste spring into summer. Sun/Part Shade. 1m.	7.50
Patrinia affinis var. punctiflora	A Chinese species with cut, course basal leaves. The red stems carry airy cloud like masses of wondrous tiny greeny-yellow flowers. Sun/Part Shade. 1m.	7.50
Pelargonium 'Lavender Lindy'	Species like pink flowers with a red throat, hover like butterflies on this scented leafed beauty. Keep dry in winter. Sun. 30cm.	7.50
Pelargonium 'Attar of Roses'	Perhaps the best scented foliage of them all making it excellent for culinary use. Position the pot where you accidentally brush past it, regularly. 60cm. AGM	7.50
Pelargonium abrotanifolium	Tending to a trailing habit, the handsome cut silver- grey leaves bear small white flowers with their upper petals feathered with purple. Sun.	7.50
Pelargonium sidoides (Reniformia group)	Velvety scalloped silvery leaves, the dark violet-purple flowers, though small, make a resonant statement. Very attractive and almost hardy if kept winter dry. Sun. 35cm.	7.50
Pennisetum 'Fairy Tails'	A very romantic grass, the fine fingers of flower from mid summer are ideal for punctuation or for the mid border. Sun and well drained soil. 75cm.	8.50
Pennisetum alopecuroides 'Black Beauty'	With spectacular dark busby like flowers in autumn, this is admired by all, particularly after rainfall. Enjoys moisture retentive soil. Sun/Part Shade. 90cm.	8.50
Pennisetum alopecuroides 'Hameln'	A shorter evergreen pennisetum, with pale brown bristles and thin lance-like leaves. Full Sun. 60cm. AGM	8.50
Pennisetum alopecuroides 'Herbstzauber'	Looking like an obese Pincushion, the dark brown bottlebrush flowers of this fine German selection always draw positive comments. Sun. 50cm.	8.50
Pennisetum macrourum	Like cream-white vertical Pipe Cleaners held aloft on stiff 6 ft stems. Like exclamation points in the flowerbeds. Sunny, well drained. 1.8m.	8.50

Pennisetum orientale	Beth Chatto's description 'pink and mauve caterpillars on wiry stems' takes some beating. Adores chalk. Full Sun. 45cm. AGM.	8.50
Pennisetum thunbergii 'Red Buttons'	A fountain grass with conspicuous, big bug sized copper-red flowers through summer. Sun. 90cm.	8.50
Pennisetum villosum	Giant white furry caterpillars on arching stems. Excellent in a pot, raised bed or on a bank. Tuck it up a bit in winter. 60cm. AGM.	8.50
Penstemon 'Cherry Red'	Produces a brilliant and long lasting display of cherry red flowers with narrow, elegant foliage, unusual for a Penstemon. Sun. 75cm.	7.50
Penstemon barbatus ssp. Coccinea	A tall, upright penstemon with red tubular flowers hanging from sturdy stems. Pollinator friendly. Full Sun. 1.3m.	7.50
Persicaria amplexicaule 'Firedance'	Thin tapers of resonant carmine-red over fresh green foliage through summer and autumn. A sharp eyed Oudolf selection. Sun/Part Shade. 1.2m.	7.80
Persicaria amplexicaulis 'Alba'	Cool white flower spikes from July til September. Full Sun to Full Shade just not too dry! 80cm. AGM.	7.80
Persicaria amplexicaulis 'Inverleith'	Smaller in all its parts and pretty, border front candidate. Rich reddish pink. Sun/Part Shade. 50cm.	7.80
Persicaria amplexicaulis 'Lage Zaailing'	Hans Kramer's selection translating as 'Short Seedling', which at 75cm, short it is. Light rose-red spikes. Sun/Part Shade. 75cm.	7.80
Persicaria amplexicaulis 'Marchants Red Devil'	Fat and bold red spikes from summer onwards. Being shorter than most red forms makes it a handy addition. Sun/Part Shade. 70cm.	7.80
Persicaria amplexicaulis 'Rosea'	Upright narrow spikes of small, pale pink flowers held in crimson calyces creating for weeks a charming two toned effect. Sun/Part Shade. 1.2m.	7.80
Persicaria amplexicaulis 'Taurus'	A classy Bressingham Gardens introduction, the spikes of vibrant ruby-red flowers are the darkest and richest of those we grow. Sun/Part Shade. 1.2m	7.80
Persicaria dshawachischwili	A rare Bistort from Armenia/Georgia with a dazzling months display of white plumes over a strong but slow spreading clump. 10% off if you can pronounce the name correctly! Sun/Part Shade. 2m.	8.50
Persicaria runcinata 'Purple Fantasy'	The dark chevrons on the foliage lighten through the year and a slender white flowerhead appears from midsummer onwards. Can be a bit of a thug in the border, but easy to pull out. Sun /Part Shade. 60cm.	7.80

Persicaria virginiana var. filiformis	Bright green leaves with deep maroon batwing markings. Sends up wiry deep red flower spikes. Sun/Part Shade. 80cm.	7.80
Peucedanum rablense	With perhaps the most delicate foliage in the garden, this summer flowering white umbel with a pink flush hails from the Italian Alps. Sun. 50cm.	7.50
Peucedanum verticillare	A tall branching umbel with purple stems and a haze of pale yellow inflorescences. Good for pollinators. Sun/Part Shade. 1.2m+	7.50
Phlomis tuberosa 'Amazone'	Whorls of lilac flowers are carried at intervals up the dark red stems and turn into glorious seedheads over winter. A pollinator magnet. Full Sun. 1.5m. AGM.	7.50
Phlox paniculata 'Fornsett Twilight'	A hard to find Phlox with the most amazing lavender blue flowers. Vigorous. Moisture retentive soil. Best in Part Shade. 1.2m.	7.50
Phlox paniculata 'Geisha's Blush'	Another of Marchants' selection. Small white flower developing a blush of, well, blush pink. Sun/Part Shade. 90cm	7.50
Phlox paniculata 'Alba'	Our ever dependable benchmark white Phlox. Looser flowering than the cultivars and therefore a little more wild looking. Sun/Part Shade. 1.2m	7.50
Phlox paniculata 'Burgii'	Dense heads of mid-pink flowers with a dark eye. Christopher Lloyd selection. Sun/Part Shade. 1.2m.	7.50
Phlox paniculata 'David'	All singing, all dancing award winner from the US with noticeably larger flowers than other whites. Sun/Part Shade. 90cm. AGM.	7.50
Phlox paniculata 'Kirchenfuerst'	Large panicles of deep reddish-pink flowers throughout July and August. Beautifully scented for those summer evenings. Sun/Part Shade. 90cm.	7.50
Phlox paniculata 'Marchant's Darkest'	A rich purple pink which stands out in the border. A winner, we humbly suggest. Sun/Part Shade. 90cm.	7.50
Phlox x arendsii 'Hesperis'	Dense clusters of lilac-pink flowers with that unforgettable phlox scent. July/ August flowering. Sun/Part Shade. 80cm.	7.50
Poa labillardierei 'Marchants Needle'	A seedling raised here. The grey foliage is noticeably narrow, a clump resembling a bizarre Pincushion! Flowers are delicate panicles of silver. Sun. 80cm.	8.50
Polemonium carneum 'Apricot Delight'	Often with differing coloured flowers on the same stem, each with a hint of apricot to them. This pretty Jacob's Ladder sits happily at the border's edge in part shade. 40cm.	

Polygonatum biflorum	This is the classic Solomon's Seal. The large subtly pleated leaves cover the hanging bells of creamy flowers beneath. An elegant plant for shade. 90cm (or more).	7.80
Polygonatum curvistylum	Those among you more familiar with green/white 'Solomons Seal' will be enthralled by this Himalayan species. From the axils of the narrow leaves hang small mauve flowers in clusters. Shade. 35cm.	7.50
Polypodium cambricum 'Oakleyae'	The segments are closely stacked together in this form giving the frond a dense and well-structured appearance. Very beautiful. Moist and dry soils. Shade. 30cm.	7.80
Polypodium glycyrrhiza 'Longicaudatum'	A fern of character with bipinnate fronds each one terminating in a long pointed tip. Shade. 30cm. AGM.	7.80
Polypodium glycyrrhiza 'Malahatense'	Easily distinguished by the fact it bears 3 distinct frond shapes on any one plant. Shade. 30cm	7.80
Polypodium glycyrrhiza (cambricum large form)	Bold bi-pinnatifid fronds whose classic, simple line could not be improved upon. The root apparently tastes of liquorice. Shade. 45cm	7.80
Polypodium x mantoniae 'Cornubiense'	Elegant bipinnatifid fronds taper to a fine point but produce irregular fronds too. Shade. 30cm.	7.80
Polypodium cambricum 'Hornet'	A curio discovered in Wales but unlikely to win a Fern beauty contest. Interesting none-the-less. Shade. 15cm.	7.80
Polypodium cambricum 'Richard Kayse'	Discovered in 1668, surely the oldest plant in our list. The pinnae are distinctly pointed in this sterile form which is claimed to be one of the most beautiful. Shade. 30cm. AGM.	7.80
Polystichum setiferum 'Pulcherrimum Bevis'	Divisions (not wayward micro-pros) of this blindingly good form of the Soft Shield Fern. Few ferns can match it. Shade/Part shade. 1m. AGM.	14.00
Polystichum setiferum plumosum group 'Washfield Form'	With each individual leaflet shaped like a mini hawthorn leaf, this Softshield fern is a truly beautiful form from Elizabeth Strangman's garden. Shade. 60cm.	7.80
Potentilla 'Flambeau'	Large, semi-double deep red flowers with a paler yellow centre through summer. Good drainage will suit it well. Sun. 35cm	7.50
Potentilla atrosanguinea var. argyrophylla	A joyful little cinquefoil. The orange-centered yellow flowers emerge from the silver serrated foliage like a burst of pure sunshine. Sun. 50cm.	7.50
Potentilla recta var. sulphurea	A delicate pale yellow flowered form of this upright, much branched, green leaved cinquefoil. Sun. 45cm.	7.50

Potentilla thurberi 'Monarch's Velvet'	Deep madder-red flowers with a black-maroon eye, the size of a ten penny piece. Ever gaining a fan club. Sun. 50cm	7.50
Pulmonaria 'Blue Ensign'	Large flowers, vivid deep blue over unspotted, bottle green foliage. First rate. Shade. 25cm. AGM	7.20
Pulsatilla vulgaris var. Rubra	A chalkland native, endangered in the wild. These seedlings are from our wonderful burgundy red form. Sun and good drainage. 25cm.	7.50
Rodgersia 'Die Anmutige'	Meaning 'Graceful', the soft pink flowers of this Rodgersia, more than live up to its name. With light green, wrinkled, palmate leaves. Likes moisture and shade. 1.2m.	8.50
Rodgersia aesculifolia aff. SSSE 306	The beauty of the pale sulphur-yellow buds really caught our attention, as did the panicles of scented white flowers which followed. Moisture and Shade. 1m+	8.50
Rodgersia podophylla	Ample palmate leaves emerge in spring, strikingly bronze flushed, eventually turning green but retaining their beauty until autumn. Creamy white flowers. Likes moisture and Shade. 90cm.	8.50
Rosmarinus officinalis 'Fota Blue'	A lounging Rosemary for walls and banks with brilliant blue flowers. Needs good drainage and sun. 30cm.	7.50
Rudbeckia fulgida var. sullivantii 'Goldsturm'	This is a bold yellow! In fact, yokes of free-range eggs spring to mind. Whilst brazen, it remains a peerless plant. Sun / Part Shade. 90 cm. AGM	7.80
Rudbeckia lacinata 'Starcadia Razzle Dazzle'	Crinolines of summer yellow petals support a prominent pale green cone. She dances elegantly in the border. Sun /Part Shade. 1.5m. AGM	7.80
Rudbeckia laciniata 'Herbstsonne'	The large bright yellow drooping petals and central green cone make for a plant of enormous quality. Tangos beautifully with Salvia uliginosa through the autumn. Sun/Part Shade. 2m+.	8.50
Salix alba var.vitellina 'Britzensis'	A beacon of fire in the winter with remarkable orange stems. Spectacular against a blue sky. Perfect for pollarding. Full Sun. Moisture retentive soil. 1.8m +	10.00
Salix eleagnos	The narrow silver-backed leaves of this shapely shrub give it the appropriate name of 'Rosemary-leaved Willow'. It would make a worthy contribution to any border that is not too dry. 2m+	10.00
Salvia 'Blue Haze Seedling'	Our seedling of Blue Haze and, so far, so similar, but there maybe a surprise amongst them. Good and chunky like the parent. Sun. 1.5m.	7.50

Salvia 'Blue Haze'	Formerly Perovskia. The broad, silvery uncut leaves make for a chunkier plant than the spires. It is also taller by far and capable of reaching 1.5m. Sun.	7.50
Salvia 'Mulberry Jam'	An earlier flowering salvia involucrata, with deep pink flowers and slightly darker calyces. Long flowering, but borderline hardy. Sun. 1.2m	7.50
Salvia 'Pink-Pong'	The pinkest of pink with a name to match! A strong grower. Great in pots. Well drained soil. Full Sun. 1m.	7.50
Salvia 'Blue Spire'	Formerly Perovskia. In a well drained soil there is no better shrub to provide a vertical accent. Highly effective combination of grey-green foliage and spikes of lavender-blue flowers in summer. Sun. 1m.	7.50
Salvia 'Marchants Chalk White'	More ivory than white. Our own seedling raised surprisingly from the brilliantly coloured S. 'Cerro Potosi' and equally long flowering. Sun. 40cm.	7.50
Salvia 'Nachtvlinder'	Meaning 'Night Moth'. A best seller for very good reason. The foliage smells of blackcurrant and the flowers are perhaps the darkest you'll find in this group. Sun. 70cm.	7.50
Salvia 'Trelissick'	A twiggly salvia of microphylla persuasion with cream flowers. The 'hood' being peach-pink. Sun. 60cm.	7.50
Salvia atrocyanea	From Bolivia/Argentina. A dramatic autumn Sage whose large blue-violet flowers are clasped in persistent purple stained bracts. Deciduous but tuberous and hence hardy. A fabulous shade plant. 1m+	7.50
Salvia chamelaeagnea	A South African sage which is hardy with us. A delightful combination of a white/pale blue lip, pale blue hood and reddish calyx. Its pungent leaves will remind you of 'Germolene' scuffed knees. Sun. 1.5m.	7.50
Salvia glutinosa	Known apparently as 'Jupiter's Distaff', this sticky Sage has large coarse basal leaves, pale yellow flowers and is described in one eminent book as 'Useful for rough places'. No wonder it does well at Marchants! Sun/ Shade. 1m	7.50
Salvia guaranitica 'Blue Enigma'	Wandering tuberous perennial suited to the mid border where its rich blue flowers and calyx can mingle late summer. Sun. 1.5m. AGM.	7.50
Salvia lavendulifolia	Slender grey leaves, freely produced spikes of lavender-blue flowers and a broad spreading habit make this a super plant for the border front, banks or walls alike. Sun. 40cm.	7.50

Salvia microphylla 'Cerro Potosi'	Large carmine pink flowers and a remarkable blackcurrant scented foliage makes a lusty plant. Sun. 50cm. AGM.	7.50
Salvia nemerosa 'Amethyst'	Sways more to the lavender/lilac spectrum than other nemerosas and is a useful plant where vertical lift is required. Sun. 70cm. AGM.	7.50
Salvia nemerosa 'Caradonna'	The violet flowers and striking black-purple stems lift this plant into a different league altogether. Sun. 50cm.	7.50
Salvia nemerosa 'Ostfriesland'	Spikes of red purple flowers over sage like leaves. A border must-have. Long flowering. Sun. 60cm.	7.50
Salvia stolonifera	The dark green foliage of this Mexican sage is deeply ribbed while the large tubular flowers are a startling bright orange. Said to prefer a modicum of shade. Hardy? 60cm.	7.50
Salvia uliginosa	Wand-like stems carry clear sky-blue flowers freely produced over a very long season. We find it impossible to tire of this plant. Sun. 1.8m. AGM.	7.50
Salvia verticillata 'Hannay's Blue'	The small flowers, in truth more lilac-mauve than blue, are born in whorls on 45cm stems. A pleasing plant for front of stage performance. Sun. 60cm.	7.50
Salvia x sylvestris 'Blauhügel'	The value of this group of salvias cannot be overstressed, providing color over a long period. The flowers of this dependably good, short form are lavender-blue. Sun. 40cm. AGM.	7.50
Salvia 'Tutti-Frutti'	To describe this as the colour of pink blancmange may not be the best marketing, but there is definitely something of a sweet treat about this salvia. Sun. 60cm.	7.50
Sanguisorba 'Blackthorn'	Fuzzy, pink upright candles. Admired by all. Late summer flowering. Sun/Part Shade. 1.5m.	7.80
Sanguisorba 'Burr Blanc'	A Marchants saucy white seedling. Quite unlike other white forms, the flowers emerge from celadon green buds and retain a fresh appearance for weeks on end, even in drought. Sun/Part Shade. 1.2m.	7.80
Sanguisorba 'Little Angel'	The smallest Burnet we grow with delicate variegation thrown in too. The burr-like flowers are typically dusky red. Utterly charming. Sun/Part Shade. 15cm. AGM	7.20
Sanguisorba 'Red Busby'	Selected here for its capacious growth and strong stems which terminate in a teeming mass of fat deep wine-red burrs. Particularly decorative 'toothy' foliage we think. Sun/Part Shade. 1.75m.	7.80

Sanguisorba 'Sanguine Dwarf'	Hard to believe, this was a seedling raised here from S. 'Arnhem'. Sun/Part Shade. At 35cm, very cute.	7.20
Sanguisorba 'Scapino'	Like a throng of unleashed, suspended red caterpillars this is a colourful and playful introduction, worthy of the border front. Sun/Part Shade. 1m+	7.80
Sanguisorba 'Cangshan Cranberry'	We so value this super plant for its Sept-Nov display of dusky red flowers on self-supporting, upright stems. Sun/Part Shade. 2m+. AGM.	8.50
Sanguisorba canadensis hybrid	Probably a species, this is our own name for this short S. Canadensis look alike. Upright spikes of white flowers for weeks, holding its structure & seed heads well. Sun/Part Shade. 1.2m.	7.80
Sanguisorba hakusanensis 'Lilac Squirrel'	A great foliage Burnet resembling a silver-green cushion of broad Melianthus like toothed foliage. The late summer flowers are large, lilac-pink, fuzzy and hang. Sun/Part Shade. 1m.	7.80
Sanguisorba menziesii 'Fine Form'	Conspicuous maroon burrs, the largest and first to flower in mid-summer. Always admired by customers unfamiliar with this genus – the best recommendation of all. Sun/Part Shade. 1m.	7.80
Sanguisorba menziesii hybrid	An early flowering sanguisorba (June). Upright in form with a fuzzy raspberry burr. Coming in at a useful 80cm in height. Sun/Part Shade.	7.80
Sanguisorba officinalis 'Arnhem'	The burrs of this lanky 'Burnet' hover like small raspberries on wiry, branched stems and hold their colour for weeks. A great favourite here. Sun/Part Shade. 1.8m.	7.80
Sanguisorba officinalis 'CDC262'	Thimble sized dark maroon burrs spaciouly arranged on a rigging of wiry stems. Worthy of a design award, but needs a catchier name! Sun/Part Shade. 60cm.	7.80
Sanguisorba tenuifolia 'Rosea'	Brought back from a trip to Holland 25 years ago. Conspicuous, deep pink flowers and handsome cut foliage. Sun/Part Shade. 1.5m+	7.80
Saxifraga stolonifera 'Kinki Purple'	Rounded hairy leaves with red marbling and racemes of white butterflies held on red stems. Perfect for dry shade. 30cm.	7.20
Saxifraga x geum 'Fuzzypeg'	Much better than our original name of 'The Hairy One', distinguished by the fine little hairs on the leaves. A very effective small London Pride for the border edge. Spring. Shade. 20cm.	7.20
Saxifraga x geum 'Pink Froth'	Forms tight evergreen rosettes of deep bottle green foliage, its stems covered in tiny pink flowers. Spring. Shade. 20cm.	7.20

Scabiosa columbaria ochroleuca	Pale yellow flowers held on a tracery of wiry stems through the summer. A very beautiful plant. Sun / good drainage. 60cm.	7.50
Schizachyrium scoparium 'Blue Heaven'	Little Bluestem. A variable clumping grass, this leaden blue selection has impressed us with its seasonal colour development climaxing in autumn in red, purple and orange. Its biscuit coloured seed heads are also good. Good drainage and sun. 40/50cm.	8.20
Sedum 'Bertram Andersen'	A beautiful low growing Stonecrop. Dusky purple foliage and wine red flowers. Pollinator magnet. Full Sun. 20cm. AGM.	7.50
Sedum 'Karlfunkelstein'	Worth growing for the exceptional smoky-purple foliage alone. The flowers are a muted pink. Full Sun. 35cm.	7.50
Sedum 'Marchants Best Red' AGM	A rich, ruby red in fact. The green leaves are purple flushed. Full Sun. 40cm	7.50
Sedum 'Matrona'	The meatiest sedum we grow with large purple flushed, green leaves. The dusky pink flower heads are large too, fading to rich brown and persist long into the winter months. Full Sun. 60cm.	7.50
Sedum telephium subsp. ruprechtii	A first rate foliage plant, the glaucous blue-green leaves taking on a purple caste as the seasons progress. Pale yellow flowers fade to light tan. Full Sun. 45cm.	7.50
Selinum wallichianum 'West Acre Form'	Differs from the type with its red flushed stems, a prolific display of slightly domed flowers and if anything, even finer foliage. Sun/Part Shade. 1.5m	7.80
Serratula tinctoria var.seoanei	A modest, little knapweed which makes its unassuming entry late in the season with fuzzy pale violet flowers over deeply cut foliage. Charming. Sun. 30cm.	7.50
Seseli gummiferum	The Moon Carrot is a distinct Umbellifer, its silver-green cut foliage Artemisia like. The confection of pale pink buds open to an orbit of white flowers carried on stout stems. Dry Sun. 80cm.	7.50
Sesile hippomarathrum	Over a satisfying mound of fine, carrot like foliage, wayward stems terminate in small umbels of creamy-white flowers from dusky pink buds through late summer. Sun. 30cm.	7.50
Sesleria 'Greenlee's Hybrid'	A sweet little evergreen grass tolerant of most soils. Fresh green foliage and darts of fluffy white flowerheads. Sun /Part shade. 30cm.	7.80

Sesleria autumnalis	Forming a neat clump of chartreuse, semi-evergreen fine leaves, with creamy flowers in summer. A good doer in most soils. A favourite of Nigel Dunnett. Sun /Part Shade. 50cm. AGM.	7.80
Sesleria nitida	From rocky habitats in Italy, this blue-grey leaved Seleria has cone shaped creamy flowers from May to July. Sun /Part Shade. 40cm.	7.80
Silene latifolia	Beautiful pure white flower on this native White Champion. Pollinating insects are attracted to its clove-like scent in the evening. Sun / Part Shade. 60cm.	7.50
Silphium mohrii	This prairie plant hails from the South Eastern US. The branched stems support large pale yellow daisies over grey-green felted foliage. Sun /Part Shade. 60cm	7.50
Sisyrinchium 'Dragon's Eye Seedling'	With tufty grassy foliage, this Iris relative, flowers for months with charming pale purple faces staring up at the sun. Needs good drainage. Sun. 15cm.	7.50
Sisyrinchium idahoense 'Pale Form'	A North American native with large flowers, a most beautiful shade of grey-blue. Good for pollinators. Sun. 15cm.	7.50
Solidago rugosa 'Loysder Crown'	This dutch selection is a fine plant, sturdy, and in clear lemon yellow. Drought tolerant and a pollinator magnet. 1.2m.	7.50
Sorghastrum nutans	A North American Prairie grass with strap like leaves and spikelets of bronze flowers. Well drained soil in Full Sun. 1m.	7.80
Sphaeralcea 'Newleaze Coral'	We know how much you all like this shrubby, silver-grey genus, so here's one with a darker reddish flower. Free draining soil and Full Sun. 80cm.	7.50
Sphaeralcea incana 'Sourup'	A hardy erect sub-shrub best pruned hard in Spring, whose pale sage green leaves are in harmony with its soft orange mallow flowers produced all summer. An unrivalled colour. Sun. 1.25m+	7.50
Sporobolus heterolepis	From green tufts rise wiry stems bearing a mass of tiny bead like flowers. But it is their amazing scent of crushed leaf coriander pervading the air that adds a touch of class. Sun. 45cm.	7.80
Stipa gigantea	Golden Oats Grass. With arching evergreen fine leaves, the flowers start their shimmering in May and in some lights it seems to be fed by a mysterious supply from the Electricity Board. Good drainage. Full Sun. 2m+.	10.00

Stipa lessingiana	Needle Grass. Slim points of gold flowers emerge from fine glaucous green foliage. Looks extremely romantic in the breeze! Sun. 1.2m	7.80
Stipa pseudoichu	Pale creamy-white narrow plumes over fine evergreen foliage. Irresistibly tactile and extremely tough. Sun. 90cm.	7.80
Stipa tenuissima 'Wind Whispers'	Forms a green mound of seemingly hair fine foliage, covered in summer by a smoky haze of pale straw flowers. Sun. 40cm. AGM.	7.80
Strobilanthes rankanensis	An excellent autumn flowering perennial with tubular blue purple flowers, the shape of a gramophone horn! Part to full Shade. 90cm.	7.50
Stylophorum lasiocarpum	A poppy for shade, also known as the 'Chinese Celandine Poppy'. Self seeds gracefully, amongst ferns and woodland planting. Large golden yellow flowers. 40cm.	7.50
Succisa inflexa 'Frosted Pearls'	These pearly coloured flowers bob about on top of their branched stems. Perfect for a naturalistic damp meadow. Sun/Part Shade. 70cm.	
Succisa pratensis	Devil's bit scabious. A vivid dash of blue in the autumn border from this vigorous form of our native perennial. Likes moisture. Sun/Part Shade. 80cm	7.50
Symphotrichum 'Herbstschnee'	Syn. Aster. A sturdy stemmed, fresh, white flowering Aster. Looks after itself! Sun /Part Shade. 1.2m.	7.50
Symphotrichum 'Jessica Jones'	Syn. Aster. Delightful, ragged-edged, large pale pink flowers. Mildew resistant. Sun/Part Shade. 1m.	7.50
Symphotrichum 'Prairie Purple'	Syn. Aster. A well behaved clump-former whose self supporting wiry stems bear swags of single, large dusky purple daisies. Sun /Part Shade. 1.5m	7.50
Symphotrichum novae-angliae 'Lou Williams'	Syn. Aster. Large, iridescent, pink-red flowers, on this floriferous, mildew resistant Aster. Full Sun. 1.6m	7.50
Symphotrichum cordifolius 'Little Carlow'	Syn. Aster. Wiry stems support a number of large, lavender-blue flowers, a colour particularly enhanced by the autumn light. AGM. Sun /Part Shade. 120cm.	7.50
Symphotrichum ericoides 'Blue Star'	Syn. Aster. Myriad, lavender blue flowers with pale yellow centres over wiry growth in October. Charming. Sun. 40-50cm.	7.50
Symphotrichum ericoides 'Ringdove'	Syn. Aster. Explodes from tiny buds into a constellation of small pale lavender-blue rayed flowers with sulphur yellow centres. A favourite here. Sun /Part Shade. 50cm	7.50

Symphyotrichum ericoides var. prostratum 'Snow Flurry'	Syn. Aster. A benign green carpet of prostrate foliage eventually erupts in October into a dazzling display of tiny white blossoms, a late bonus for bees and humans alike. Sun /Part Shade. AGM. 20cm.	7.50
Symphyotrichum laeve 'Calliope'	Syn. Aster. Black stems, glossy bottle green leaves, lavender-blue flowers, masses of them. Pure class. Needs staking. 2m.	7.50
Symphyotrichum lateriflorum 'Lady in Black'	Syn. Aster. In full sun the leaves take on a suave purple-black hue. The small flowers are white with attractive rosy stamens, carried in huge numbers. Sun /Part Shade. 1.2m.	7.50
Symphyotrichum lateriflorum var. horizontale	Named for the horizontal stems that give this Aster a point of difference. The miniature white flowers with deep pink centres cover the stong framework, giving it a bushy effect. Sun /Part Shade. 60cm. AGM.	7.50
Symphyotrichum novae-angliae 'Helen Picton'	One of the darker Asters, with a violet purple flower and golden centre. A slightly raggedy look to the petals adding to the charm. Disease resistant. Sun /Part Shade. 1.2m. AGM.	7.50
Symphyotrichum novae-angliae 'Violetta'	A fine tall, dark Aster with a golden centre to the deep purple flower, and sturdy stems. Slightly earlier flowering than some of the Asters, from August onwards. Sun /Part Shade. 1.5m	7.50
Symphyotrichum novi-belgii 'Blue Eyes'	Syn. Aster. Semi-double, rounded flowers, a good blue. Always draws favourable comments from customers. Sun /Part Shade. 1.2m	7.50
Symphyotrichum turbinellum hybrid	Syn. Aster. The unruly, arching habit of this tough hybrid with its dainty pale violet-blue flowers is a delight. A great favourite here. Sun /Part Shade. 1.2m.	7.50
Tamarix ramosissima 'Pink Cascade'	Our beautiful Tamarix does so well in the summer droughts. With fuzzy fine foliage and sprays of tiny pink flowers in late summer slightly reminiscent of candy floss! Full Sun. 5m. AGM.	12.50
Teucrium hircanicum	Caucasian Germander. Strong spikes of reddish purple with a coarse sagittate leaf. Versatile and vigorous. Can seed itself - a lot! Sun /Part Shade. 60cm.	7.50
Thalictrum 'Black Stockings'	A saucy name for these dark purple flower stems that support a fuzz of rosy-purple flowers. A real crowd pleaser. Sun /Part Shade. 1.2m. AGM.	7.80
Thalictrum 'Elin'	Tall, sturdy purple stems with glaucous ferny foliage, and a fuzzy purple pink hazy flowerheads. A vigorous and imposing hybrid (T.flavum glaucum x T.rochebruneum) 2.5m+. AGM.	7.80

Thalictrum aquilegifolium 'Small Thundercloud'	A corker of a plant. Creates considerably more than a storm in a teacup with its generous clouds of purple flowers. Part Shade. 40cm.	7.80
Thalictrum delavayi	From W. China. The small, nodding rosy lilac flowers with their prominent stamens provide an entrancing display on their tracery of wiry stems in summer. A refined plant in every respect. Sun /Part Shade. 1.5m.	7.50
Thalictrum delavayi 'Album'	An exquisite beauty with small cupped, virgin white flowers held en masse on wiry stems in summer. A plant for your very best soil. Sun /Part Shade. 1.5m.	7.50
Trifolium pannonicum	Masses of large creamy yellow clover flowers all summer over clumps of trefoil leaves. Sun. 50cm.	7.50
Trifolium rubens	An unusual clover, the short spikes of soft red flowers make an excellent contribution to the mid-summer flower border. Sun. 45cm.	7.50
Tropaeolum polyphyllum	A bizarre Nasturtium with prostrate, cut silver foliage and yellow flowers. Good drainage. Sun. 10cm. AGM.	7.50
Tulbaghia 'Cariad'	Aptly named 'Love' in Welsh, with typically shaped lilac-pink flowers. The central corona however is a deep burnt orange. Beautifully scented - Of cloves! Sun. 15cm.	7.50
Tulbaghia 'Cosmic'	A vigorous Tulbaghia with lilac flowers and contrasting corona of golden yellow. Full Sun. 50cm.	7.50
Tulbaghia 'John May's Seedling'	Prolific seed set last summer means we will be offering strong young plants this summer. Interesting! Full Sun. 50cm.	7.50
Tulbaghia 'Fairy Star Mk II'	Plucked from seedlings here and a tad more robust than the original, with thicker leaves. Still the same beautiful pale lilac-mauve colouring. Full Sun. 30cm.	7.50
Tulbaghia 'John May's Special'	A paragon among Tulbaghia with very large (relatively speaking) violet flowers the summer long. Sun. 60cm.	7.50
Tulbaghia 'Snow White'	Large heads of purest white flowers with no hint of pink. Crisp effect. Full Sun. 30cm.	7.50
Tulbaghia violacea 'Harry Hay'	Given to me by legendary Harry Hay it seems appropriate to name it after him. A form of T. violacea, it carries large lilac-mauve flowers with a pale purple corona and is quite distinct. Sun. 45cm.	7.50
Tulbaghia violacea 'Large Flowered Form'	Prodigious 10p sized flowers, like small windsails in pale lilac-pink. Full Sun. 40cm.	7.50

Valeriana officinalis	British native. Stiff branched stems soar over clumps of pinnate foliage, carrying clusters of sweet scented small white flowers, to the delight of many pollinators. Sun /Part Shade. 1m+.	7.50
Verbascum blattaria f. albiflorum	Tall white spires of flowers with purple centres. Attractive to many pollinators, and to us! Full Sun. 90cm.	7.20
Verbascum phoenicium 'Violetta'	Rich purple spires of flowers ascend from a basal rosette of leathery leaves. A short, airy mullein, which happily self seeds on free draining soil. Full Sun. 60cm.	7.20
Verbena bonariensis	Erect, skeletal 'Giacometti' like stems bear clusters of tiny lavender-purple flowers through summer and autumn. Pollinator magnet 1.5m. AGM.	6.90
Verbena officinalis var. grandiflora 'Bampton'	Delicate wisps of lilac flowers on wiry branches with purple foliage make this a most beautiful plant, and the pollinators agree. Full Sun. 1m.	7.20
Verbena rigida f. lilacina 'Polaris'	A very pretty pale lavender variant of the usually bedded species. Pessimists would have us believe it is not hardy – balderdash! Sun. 30cm.	7.20
Vernonia arkansana	Iron Root. So called because of its brutishly tough roots. A late perennial which should be better known. Tall, leafy stems are topped in Sept/Oct. with a display of small crimson-purple aster like flowers. Sun /Part Shade. 1.8m+	7.50
Veronica longifolia	The beautiful Longleaf Speedwell clumps up gradually and produces spires of intense blue flowers. Long flowering season. Sun /Part Shade. 80cm.	7.50
Veronicastrum sibiricum 'Kobaltkaars'	From Dutch nurseryman friend Hans Kramer, bearing mid-violet-blue coloured spikes. Sun /Part Shade. 1.25m	7.80
Veronicastrum virginicum 'Diane'	A good pure white form, somewhat shorter than V.V. album. Sun /Part Shade. 1.2m.	7.80
Veronicastrum virginicum 'G's pale pink'	One of Graham's seedlings that has the Piet Oudolf seal of approval. A good mid-height pale pink. Sun /Part Shade. 1.4m.	7.80
Veronicastrum virginicum 'Lavendelturm'	An elegant strong growing form, with large airy heads of pale lavender–lilac flowers. Sun /Part Shade. 2m. AGM.	7.80
Veronicastrum virginicum 'Album'	The beautiful white form, flowering through July and August, but looking equally beautiful as a seedhead thereafter. Sun /Part Shade. 1.6m. AGM.	7.80
Veronicastrum virginicum 'Erica'	The flowers are pale rose pink becoming darker towards the tip. With contrasting dark stems and purple tinted foliage. Sun /Part Shade. 1.2m.	7.80

Veronicastrum virginicum 'Pointed Finger'	For those among you who misbehaved at school, the angle the flower spikes assume will remind you of a long forgotten but all too familiar experience. 'Gough! - Headmaster!' Lavender-blue. Sun /Part Shade. 1m.	7.80
Veronicastrum virginicum f. roseum	Soft pink flower spikes followed by persistent warm, coppery seed heads in winter make this a favourite here. Sun /Part Shade. 1.5m	7.80
Viola 'Heaselands'	Such a good strong plant with large scented, pale violet flowers. Very reliable. Sun /Part Shade. 20cm.	7.50
Viola 'Inverurie Beauty'	The abundant fair sized mid violet flowers are carried on lengthy stems making them ideal for Tuzzy-Muzzies. Sun /Part Shade. 30cm. AGM.	7.50
Viola cornuta 'Alba'	The light green foliage is contrasted with pure white flowers, continuing for months on end. Sun /Part Shade. 15cm	7.50
Viola cornuta 'Marchant's Purple'	A pure cornuta with small, deep purple flowers that continuously blooms. Sun /Part Shade. 20cm.	7.50
Viola cornuta 'Gypsy Moth'	Pale lavender-blue and cream. From the talented Elizabeth MacGregor. Sun/Part Shade. 20cm.	7.50
Zizia aurea	A sparkle of zingy yellow flowers above finely cut foliage. A useful knee high umbellifer. Sun / Part shade. 45cm.	7.50
